

# Solar photovoltaic panels used by the captain

## Overview

---

In addition to the Solar Skin, each catamaran's bimini area, the zone where shade is provided to the captain of the ship, comes equipped with photovoltaic cells that have been honed for shaded environments, pulling in the sun's energy. French company Selar introduces the cruise ship Captain Arctic with foldable solar panel sails, allowing the ship to exploit and use both wind and solar energy. Selar's cruise ship named Captain Arctic has retractable sails covered with solar panels so the vessel can harness and use the energy coming from the wind and sun. This, combined with propeller shafts that act as hydro turbines, significantly reduces the ship's reliance on fossil fuels. The ship is also equipped with a dynamic positioning. In late November 2024, the UAE-based engineering company Goltens hosted a keel-laying ceremony for Captain Arctic, a polar expedition vessel ordered by French ship operator Selar. Selar is having the 70-metre yacht built in Mauritius with five wing masts, each 35 metres long, which will cover almost 2,000 square metres of solar cells.

## Solar photovoltaic panels used by the captain

---

### Sunergy Systems , Employee-Owned Solar in Washington State

We specialize in the sales, design, and installation of solar electric and backup energy storage systems for residential homes. Sunergy Systems has installed over 3,000 solar power systems for 15

### Solar Panel

The Solar Panel is capable of producing Electricity from sunlight. It, and the more advanced Solar Panel (Mono), the only ways of producing energy without causing emissions or using any fuel on a

### 70-metre yacht with the world's first solar-powered wing rig

In 2026, "Captain Arctic" aims to be the world's first solar-powered sailing yacht to embark on almost emission-free Arctic voyages. Selar is having the 70-metre yacht built in Mauritius

### [AI-controlled, solar-powered yachts a reality that came from a dream](#)

In addition to the Solar Skin, each catamaran's bimini area, the zone where shade is provided to the captain of the ship, comes equipped with photovoltaic cells that have been honed for

### [The ship is equipped with a sail covered with foldable solar panels](#)

Looking from the outside, Captain Arctic has 5 35 m high sails. They are made of aluminum, helping to withstand harsh weather conditions, and are covered with 2,000 m<sup>2</sup> of solar cells. Thanks to these

### **Best solar companies in Seattle, WA: Our 2026 picks**

Get the most out of your solar panels by choosing a top-rated solar installer that will do the job right. We reviewed Seattle, WA solar companies on the EnergySage Marketplace to help you find the best one

### **Washington and Oregon's Trusted Solar Company , A&R Solar**

A&R Solar is the leading solar company serving Washington and Oregon, offering expert solar panel installations, home battery backup, and reliable support.
