

Solar power generation in rainy and snowy days

Overview

Solar panels continue generating electricity during rain and cloudy weather, though at reduced capacity compared to sunny conditions. Solar panel systems rely on the photovoltaic (PV) effect to convert sunlight into electricity. Naturally, weather conditions such as clouds, rain, and snow can significantly impact how much energy your system produces. Clouds roll in, seasons change, and rain happens. The 'Edge-of-Cloud' . Cloudy days don't mean your solar panels stop working.
