

Solar power promotion

Overview

Many state and local governments offer various incentives to make solar energy more affordable and encourage the adoption of clean energy. In California, a typical 7-kilowatt residential system costs \$16,758 before any financial incentives. To learn more, visit the SOMAH website. The Disadvantaged Communities - Single-Family Solar Homes (DAC-SASH) program is administered by GRID Alternatives, a nonprofit . While solar prices have dropped substantially over the last decade, installing solar panels still costs an average of \$29,649 for a typical 12 kW system before incentives. We encourage anyone who is eligible to apply.
