

# Solar rooftop power generation cost

## Overview

---

Solar panel installations typically cost between \$13,962 and \$27,924 in 2026. The actual price tag depends on your home's energy needs, roof characteristics, local incentives and other factors, all of which we'll break down in this guide. Most installers price systems according to your needs. [Solar Costs Have Reached Historic Lows: Average residential solar costs have dropped to \\$3.30 per watt in 2025, representing a 60% decrease from 2010 levels. Combined with the 30% federal tax credit extended through 2032, most homeowners can achieve payback periods of 6-12 years with 25+ kWh of solar. Compare loan, lease, and purchase options for your solar panels based on your results. Solar savings are calculated using roof size and shape, shaded roof areas, local weather, local electricity prices, solar costs, and estimated incentives over time. Search trends show queries like "is solar worth it" reflecting uncertainty across regions. Residential rooftop PV solar panels cost per watt installed has been dropping and newer technology is enabling a far greater efficiency - that's more solar energy converted into electricity for home usage - for less money. Using these numbers, NLR analyzes the total costs associated with installing photovoltaic \(PV\) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems. NLR's PV cost benchmarking work uses a bottom-up approach.](#)
