

Somalia Solar Power Generation System

Overview

Somalia is taking another step toward energy sustainability by launching a tender for a 12 MW solar power plant paired with a 36 MWh battery energy storage system (BESS) in the northeastern port city of Berbera. 13 February 2023, Mogadishu - The United Nations Development Programme (UNDP) and Federal Government of Somalia launched today the Somalia project of the Africa Minigrids Program (AMP) to increase access to electricity and bring new development opportunities to rural communities while contributing . In 2020, the World Bank estimated at least 49 percent of the population had access to electricity. While variations exist between rural and urban areas, in 2023 the Somali Household Budget survey estimated more than half of the population (61.9 percent) had access to electricity, demonstrating . In Somalia, access to electricity impedes economic growth and sustainable development. The project includes the construction of 13. It is part of a series of briefing notes that provide a high-level overview of the status of countries' off-grid solar markets, as well as relevant policies and pr ountry.
