

# Sri Lanka earthquake outdoor power supply

## Overview

---

The Disaster Management Centre (DMC) says there is no effect on Sri Lanka from the magnitude 7.4 earthquake that hit the Northern Molucca Sea off the coast of the city of Ternate, Indonesia. With a robust 1500-watt motor, the Earthquake 32228 log splitter delivers exceptional splitting force, making it effortless to handle tough logs efficiently and quickly. Equipped with precision pump gears, this log splitter ensures smooth operation and optimal performance, enhancing reliability .

- Partners are increasing support to the National Building Research Institute (NBRI), which operates at capacity due to the high volume of assessments required, resulting in delays in hazard verification and site clearance. The DMC said there was no risk to Sri Lanka, despite Tsunami warnings being issued to several neighbouring .

Parallel to the global energy transition, we are driving the sustainable energy revolution taking place across Sri Lanka underscored by the steady expansion of the Sri Lankan energy sector. The sustainable energy industry is expected to facilitate a number of economic activities and continue to .

The Sri Lanka 2004 disaster was one of the cataclysmic events that took place in the Indian sub-continent countries struck by a tsunami resulting from the Indian Ocean earthquake on 26 December 2004. On 3 January 2005, Sri Lankan emergency authorities had reported 30,000+ confirmed deaths. [1][2] .

COLOMBO (News 1st); Sri Lanka is facing widespread disruption as relentless heavy rains and strong winds continue to batter the island, triggering floods, landslides, and infrastructure breakdowns. Authorities have announced urgent measures to mitigate the impact, as transportation networks and .
