

The latest news on European energy storage systems

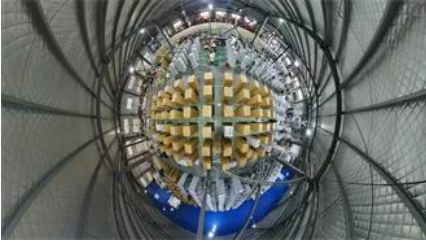

Overview

1 GWh of new battery capacity installed in 2025, marking the EU's 12th consecutive record year for battery storage deployment. What is the future for the grid-scale energy storage market in Italy, now that the dust has settled from the country's long-awaited MACSE auction for BESS?

Energy-Storage. news proudly presents our webinar with Fluence, 'Grid-forming: From niche application to standard requirement. The statement highlights the role of LDES in strengthening energy security, reducing system costs, and supporting industrial . Greek energy company Metlen Energy & Metals (ATH:MYTIL) saw the EBITDA of its renewables platform contract by 78% in 2025 because of losses incurred from its engineering, procurement and construction (EPC) activities. By 2023, almost a quarter of all the energy we consumed came from renewable sources - double the share in 2010, when it sat at 12. Building on this progress and to keep the momentum, in 2023, EU countries set the binding target of achieving a share . 27. Residential installations declined by 6% .
