

The role of high bracket installation of photovoltaic panels

Overview

The top-of-pole solar bracket is a mounting system used to securely install solar panels on top of a pole or post. The solar panels cannot maintain steady performance and stay safe without brackets. But ask any solar installer worth their torque wrench, and they'll tell you proper photovoltaic bracket usage makes or breaks a solar array's performance. Choosing the right PV bracket will not only reduce the project cost, but also reduce the post maintenance cost.
