

UK solar energy storage power generation project

Overview

(Alliance News) - The UK government has approved a solar energy project set to be the largest in the UK in terms of power generation. Springwell Solar Farm is a proposed 800-megawatt project with battery storage and supporting grid connection infrastructure in North Kesteven . The UK's battery storage sector is charging ahead at an incredible pace. Since 2020, operational capacity has increased by 509%, climbing from 1,128 MW to 6,872 MW in 2025. So far this year, more than 1,405 MW of new capacity has been commissioned, already beating the total for 2024 and putting the . The UK government has approved the country's largest power-producing solar farm following a planning inquiry, marking a major step in its clean energy push. Developer and independent power producer (IPP) Cero Generation has connected its Larks Green solar and storage facility to the UK transmission network.
