

UK solar energy storage project ranking

Overview

Listed below are the five largest energy storage projects by capacity in the UK, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global energy storage segment. The UK had 3,096MW of capacity in 2022 and this is expected to rise to 13,000MW by 2030. 5 GWh, the UK is a leader in the European battery storage sector. Achieving these goals seems possible. The first major utility-scale battery storage project was energised in 2017 - a 50MW/25MWh project in Pelham, developed . SSE Renewables, Matrix Renewables, Drax and Voltaria have all progressed large-scale BESS projects in the UK, all-in-all totalling 1. Among our members' submissions is the UK's biggest rooftop photovoltaic installation, fitted at the UK's busiest port.
