

Ukraine s new centralized energy storage power station

Overview

The project consists of six new systems with capacities ranging from 20 to 50 MW, strategically located in Kyiv and Dnipropetrovsk regions. Construction timeline: March - August 2025 (just six months). Purpose: To ensure grid stability ahead of the critical . The largest private energy company in Ukraine DTEK has commissioned 200 MW of energy storage facilities built in partnership with US-based Fluence, a global leader in energy storage technology. This marks the launch of Ukraine's largest energy storage system. This was reported by DTEK's press service.
