## Overview

---

While vanadium titanium liquid flow battery prices typically range between \$400-\$800/kWh for commercial systems, four key factors create this spread: "The sweet spot for VTFB projects is 4+ hours of storage duration. Below that, lithium-ion often wins on price; above it, flow . Modular flow batteries are the core building block of Invinity's energy storage systems. Self-contained and incredibly easy to deploy, they use proven vanadium redox flow technology to store energy in an aqueous solution that never degrades, even under continuous maximum power and depth of . Our 5kW/30kWh is our smallest self-contained battery embedding our proprietary Multigrids™ flow dynamic disruption. Residential storage customers, with or without solar panels, will find this battery able . DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to accelerate their development and deployment The U. System Scale: Think "bigger is cheaper"-sort of.
