ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

The image shows a tall, grey Energy Storage System (ESS) unit. It features two vertical green stripes running down the center. In the middle, there is a blue hexagonal shape with a black lightning bolt symbol. At the top right, the letters 'ESS' are printed in green. At the bottom, there are two yellow triangular warning symbols with black lightning bolts. The unit is mounted on a black base.

[What procedures are required for energy storage power stations?](#)

Energy storage power stations require several essential procedures, including 1. Site assessment and feasibility studies, 2. Regulatory compliance and permitting, 3. Engineering design

U.S. Codes and Standards for Battery Energy Storage Systems

This document offers a curated overview of the relevant codes and standards (C+S) governing the safe deployment of utility-scale battery energy storage systems in the United States.

Battery Energy Storage Facilities in California

The Generation and Energy Storage Section (GESS) of ESRB is responsible for enforcing GO 167-C to ensure safe and reliable electric generation and energy storage in California.

[What are the Essential Site Requirements for Battery Energy Storage](#)

Battery Energy Storage Systems represent the future of grid stability and energy efficiency. However, their successful implementation depends on the careful planning of key site

[NFPA 855, Standard for the Installation of Stationary Energy Storage](#)

NFPA 855, Standard for the Installation of Stationary Energy Storage Systems, provides insight into mitigating risks and helping to ensure all installations are performed appropriately, taking into

Eight Battery Energy Storage System (BESS) Site Requirements

In part one of our three-part series, our experts cover the site layout elements and requirements that can impact a BESS project.

[Key Procedures to Build a Large Energy Storage Power Station: A](#)

This guide breaks down the essential procedures for renewable energy developers, grid operators, and industrial users to create efficient energy storage solutions.

[Installation Codes and Requirements for Energy Storage Systems](#)

An FAQ overview of US installation codes and standard requirements for ESS, including the 2026 edition of NFPA 855 and updates to UL 9540A.

California Battery Energy Storage Safety Recommendations

CP-CA recommend that all active BESS facilities have updated HMAs. Facilities that pre-date NFPA 855 should review their HMAs to consider

any missing hazards and update the HMAs, as necessary. The

[How to Navigate State and Local Permitting for Battery Energy Storage](#)

Navigate state and local permitting for BESS projects with expert insights, regulatory steps, and strategies for successful energy storage development.
