

# What does STC mean for photovoltaic panels

## Overview

---

Standard Test Conditions (STC) are a set of laboratory conditions under which solar panels are tested to determine their performance metrics, such as wattage, efficiency, and voltage. In some cases, you also have NOCT or NMOT specs listed. Here we will explain exactly what STC means for solar panels. We know that photovoltaic (PV) panels and modules are semiconductor devices that generate an . When evaluating solar panels, you may come across the term "Standard Test Conditions" (STC).
