

# What is the shipping price of photovoltaic panels

## Overview

---

Short version: From 2024, it costs between \$2,800 and \$5,500 to ship a 20-foot container of solar panels around the world, depending on origin, destination, fuel prices, and demand. The 40-foot container, which is the one used for larger installations, ranges from \$4,500 . Thinking of going solar and want to know how much it will cost to ship those panels in a shipping container?

You're not alone. With renewable energy on the rise, particularly among off-gridders, businesses, and environmentally minded homeowners, solar panel shipping logistics are growing more . Summary: This article explores the critical aspects of photovoltaic panel shipment packaging and pricing strategies. LTL shipping is used for small freight or when the items don't require the use of an entire trailer. See the Exceptions section below the chart for other shipping scenarios.
