

Where are the photovoltaic panels in the subsidence area

Overview

The Datong Coal Mining Subsidence Area National Advanced Technology Photovoltaic Demonstration Base is located in Datong City, north China's coal-rich province of Shanxi, where an area of about 1,687 square kilometers has subsided due to prolonged and large-scale coal mining. Dubbed "sunflowers" by the maintenance staff, rows of photovoltaic panels rotate with the rising . The U. front-of-the-meter, photovoltaic facilities, direct current capacity of 1 megawatt or more, that became operational before mid-2024. Error: Could not get your location. Make sure location services are enabled in your browser or in your phone's browser app.
