

Which server rack dustproof type is safer

Overview

The answer lies in IP66 rated server cabinets, an advanced solution designed to safeguard servers through harsh environmental conditions. NEMA 12 enclosures are constructed for indoor use and provide a degree of protection to internal equipment against circulating dust, falling dirt, lint, and fibers. Configurable from 4 to 43 RU in 20", 25", or 30" depths. These are manufactured from galvanized steel, aluminum or stainless steel material, making them the perfect layer of security .
