

Which type of secondary battery inverter is better

**2MW / 5MWh
Customizable**

Overview

Lead-acid batteries are ideal for off-grid systems, offering cost-effectiveness and reliability, while lithium-ion batteries are the preferred choice for hybrid inverters due to their high efficiency and long lifespan. Pros:

- o Low cost and widely available.
- o Reliable for long-term off-grid use.
- o Requires regular maintenance, such as .

There are several types of inverter batteries available in the market, each with its unique features and benefits. The wrong kind of battery may damage your inverter.
