Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. View an interactive map or download

U.S. Wind Turbine Database

The United States Wind Turbine Database (USWTDB) provides the locations of land-based and offshore wind turbines in the United States, corresponding wind project information, and turbine technical

LAND-BASED WIND MARKET REPORT

Independent power producers (IPPs) own 90% of the new wind capacity installed in the United States in 2023, with the remaining assets (10%) owned by investor-owned utilities.

Wind turbine manufacturing and service , Vestas US

Vestas employs more than 5,000 people in the manufacturing, installation, and service of onshore and offshore wind turbines. Our North American market is served from our offices in Portland, OR,

[US wind factory growth patchy as installations rise , Reuters](#)

Manufacturers are expanding U.S. production of key components including towers, nacelles and blades, but growth is steered somewhat by whether developers must source those

Global Wind Supply Chain Series: Article 3: Wind turbine tower

More than 800GW of wind energy is expected to be installed between 2025-2030, driving the need for supply chain to ramp up to manufacture next generation tall towers

Wind Manufacturing and Supply Chain , Department of Energy

The wind supply chain that has developed in the United States in recent years has increased the domestic content of wind turbines installed in the United States, with over 80% of nacelle assembly

Energy Maps and Spatial Data

California Energy Commission develops and maintains maps and spatial information on California's energy infrastructure and related activities. Explore maps, applications, and geographic datasets to

Wind Turbine

The combined sales of large wind power plants and small turbines for distributed generation is now \$4-5 billion annually worldwide and growing. Small turbines (less than 100 kW each) are being produced

The supply chain limitations facing the wind turbine market

The fragmentation of the wind turbine supply chain poses an existential threat to global wind power expansion.
