

World s largest solar mirror power generation

Overview

The big picture: The Ivanpah Solar Electric Generating System, located in California's Mojave Desert, is the world's largest solar generator, featuring 500,000 mirrors harnessing the sun's energy. China has flicked the switch on the world's first dual-tower solar thermal power station, a . A solar power tower, also known as 'central tower' power plant or ' heliostat ' power plant, is a type of solar furnace using a tower to receive focused sunlight. It uses an array of flat, movable mirrors (called heliostats) to focus the sun's rays upon a collector tower (the target). One key stat: This groundbreaking facility generates 386 megawatts of clean energy .
